Professional Summary

Performance-driven **Mobile Application Developer** with hands-on production experience engineering scalable cross-platform apps using **Flutter** and backend APIs with **FastAPI**. Proficient in architecting modular systems using **MVVM** and **MVC**, leveraging **Riverpod (with code generation)** and **GetX** for predictable state flows. Expert in deep linking via **GoRouter**, robust networking with **Dio**, and shipping optimized applications to the Google Play Store and Apple App Store.

Technical Skills

Languages: Dart, Python, JavaScript, Java, C/C++, SQL, HTML5/CSS3

Frameworks & Libraries: Flutter, FastAPI, Riverpod Generator, GetX, Provider, BLoC, Dio, GoRouter

Architecture & Patterns: MVVM, MVC, Repository Pattern, Dependency Injection, State Management

Backend & Cloud: RESTful APIs, Firebase (Auth, Firestore, Cloud Messaging, Crashlytics), JSON, WebSockets

Databases & Storage: SQLite, Hive, Shared Preferences, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, Android Studio, VS Code, Figma, Google Play Console, App Store Connect

Professional Experience

Join Venture AI

Nov. 2025 – Present

Jr. Flutter Developer

Dhaka, Bangladesh

- Engineered and published 4 commercial mobile applications using **Flutter** and **Dart**, implementing scalable **MVVM** and **MVC** architectural structures.
- Awarded **Employee of the Month** for accelerating release cycles, eliminating UI jank, and achieving zero-crash baseline performance on production builds.
- Integrated complex REST APIs and async network interceptors with **Dio**, streamlining background synchronization and payload caching.
- Implemented reactive state architectures with **Riverpod Generator** and **GetX**, ensuring robust dependency injection and modular state logic.
- Configured push notification pipelines using Firebase Cloud Messaging (FCM) and managed automated store build releases.

Aricho IT

Apr. 2025 – Oct. 2025

Flutter Developer Intern

Dhaka, Bangladesh

- Converted complex Figma wireframes into responsive, pixel-perfect Flutter widget trees across diverse mobile form factors.
- Implemented asynchronous RESTful API consumption layers using **Dio** and HTTP clients with structured error handling.
- Collaborated with senior engineers on debugging memory leaks, optimizing widget rebuild cycles, and running pre-release testing.

Featured Projects

Crewsh Mobile App | Flutter, MVVM, Riverpod Generator, Dio, REST API – Play Store

2026

- Architected and published a mobile platform using **MVVM architecture** and **Riverpod code generation** for type-safe state operations.
- Engineered resilient network repositories with **Dio**, supporting automated token refresh, request retries, and offline caching.
- Optimized layout rendering workflows, image caching routines, and UI trees to maintain smooth 60 FPS transitions.

Walking Witness | Flutter, MVC, GetX, REST API, FCM – Play Store | App Store

2025

- Built a cross-platform sponsorship and crowdfunding application using **GetX** for state reactivity, routing, and dependency management.
- Implemented real-time village project tracking, progress milestone visualizations, and encrypted direct communication channels.
- Integrated localized caching pipelines to ensure seamless user experiences in low-connectivity environments.

MilkMix – Dairy Farm Calculator | Flutter, MVVM, Riverpod Generator, Hive – Play Store | App Store

2025

- Developed an offline-first operational calculation tool using **MVVM** to model daily milk production, costs, and profit projections.
- Engineered algorithms to compute byproduct yield metrics (cheese/butter) for agricultural cost-benefit analysis.

Covenant Hearts | Flutter, MVVM, Riverpod Generator, GoRouter, Firebase – Play Store

2025

- Developed a matchmaking platform with verified user profiles, real-time messaging, and shared community interaction features.
- Configured deep-link navigation using **GoRouter** coupled with reactive ViewModels powered by **Riverpod Generator**.

Education

Khanjahan Ali College of Science And Technology

Jan. 2020 – Dec. 2025

Bachelor of Science in Computer Science and Engineering (CGPA: 3.41 / 4.00)

Khulna, Bangladesh

- Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Compiler Design, Artificial Intelligence, Web Engineering.

Certifications & Leadership

App Development with Flutter | Ostad Certification

2025

- Completed comprehensive production-level training in Flutter architecture, reactive state management, and CI/CD pipelines.

K@CST Programming Club | Vice President & Head of Task Management

2023 – 2025

- Won **1st Place** in the University Programming Contest; led algorithm workshops and task coordination for 50+ student developers.
